Additionally Needed:

Melanin Control Slides  Part 4430
Nuclear Fast Red Stain, Kernechtrot  Part 1255
Xylene, ACS  Part 1445
Alcohol, Ethyl Denatured, 100%  Part 10841
Alcohol, Ethyl Denatured, 95%  Part 10842

APPLICATION:

Newcomer Supply Schmorl Melanin Stain demonstrates sites of reduction activity in tissue sections. A positive reaction indicates the presence of melanin and other reducing substances such as: argentaffin, chromaffin, bile and formalin pigment.

METHOD:

Fixation: Formalin 10%, Phosphate Buffered (Part 1090)
Technique: Paraffin sections cut at 4 microns
Solutions: All solutions are manufactured by Newcomer Supply, Inc.

STAINING PROCEDURE:

1. If necessary, heat dry tissue sections/slides in oven.
2. Deparaffinize sections thoroughly in three changes of xylene, 3 minutes each. Hydrate through two changes each of 100% and 95% ethyl alcohols, 10 dips each. Wash well with distilled water.
   a. See Procedure Notes #1 and #2.
3. Prepare Ferric Chloride-Potassium Ferricyanide Working Solution; combine and mix well.
   a. Ferric Chloride 1%, Aqueous 30 ml
   b. Potassium Ferricyanide 1%, Aqueous 10 ml
4. Place in Ferric Chloride-Potassium Ferricyanide Working Solution for 5 to 10 minutes.
   a. See Procedure Note #3.
5. Wash well in running tap water.
6. Counterstain in Nuclear Fast Red Stain, Kernechtrot (1255) for 5 minutes.
   a. Shake solution well before use; do not filter.
7. Rinse well in distilled water.
   a. See Procedure Note #4.
8. Dehydrate quickly through two changes each of 95% and 100% ethyl alcohol. Clear in three changes of xylene, 10 dips each; coverslip with compatible mounting medium.

PROCEDURE NOTES:

1. Drain slides after each step to prevent solution carry over.
2. Do not allow sections to dry out at any point during procedure.
3. Melanin will react quicker than other reducing substances; adjust reaction time accordingly.
4. Wash well after Nuclear Fast Red Stain, Kernechtrot to avoid cloudiness in dehydration steps.
5. If using a xylene substitute, closely follow the manufacturer’s recommendations for deparaffinization and clearing steps.
