Part 14015 January 2020

# **Brown-Hopps Modified Gram Stain with Tartrazine - Technical Memo**

SOLUTION:	500 ml	1 Liter	
Tartrazine Stain 1.5%, Aqueous	Part 14015A	Part 14015B	
Additionally Needed:			
Gram, Multi-Tissue, Artificial Control Slides	Part 4256 or	Gram+ & Gram- Bacteria, Artificial Control Slides	Part 4255
Xylene, ACS	Part 1445		
Alcohol, Ethyl Denatured, 100%	Part 10841		
Alcohol, Ethyl Denatured, 95%	Part 10842		
Crystal Violet Stain 1%, Aqueous, Brown-Hopps	Part 1041		
Iodine, Gram, Aqueous	Part 1140		
Acetone, ACS	Part 10014		
Basic Fuchsin Stain 0.25%, Aqueous	Part 1011		
Gallego Solution	Part 1098		
Acetone-Xylene 1:1	Part 10015		

For storage requirements and expiration date refer to individual product labels.

#### **APPLICATION:**

Newcomer Supply Brown-Hopps Modified Gram Stain with Tartrazine is a modification of the original Gram stain technique. Tartrazine, a synthetic water soluble, lemon yellow colored azo dye, provides a safe alternative to picric acid stains. Tartrazine Stain 1.5%, Aqueous provides vellow background staining, replacing the picric acid-acetone counterstain and the disposable issues associated with picric acid.

#### METHOD:

Fixation: Formalin 10%, Phosphate Buffered (Part 1090)

Technique: Paraffin sections cut at 4 microns

**Solutions:** All solutions are manufactured by Newcomer Supply, Inc.

All Newcomer Supply stain procedures are designed to be used with Coplin jars filled to 40 ml following the provided staining procedure.

## **STAINING PROCEDURE:**

- If necessary, heat dry tissue sections/slides in oven
- Deparaffinize sections thoroughly in three changes of xylene, 3 minutes each. Hydrate through two changes each of 100% and 95% ethyl alcohols, 10 dips each. Wash well with distilled water.
  - a. See Procedure Notes #1 and #2.
- Stain in Crystal Violet Stain 1%, Aqueous, Brown-Hopps (1041) for 2 minutes
- Rinse well in distilled water.
- Mordant in Iodine, Gram, Aqueous (1140) for 5 minutes.
- Rinse well in distilled water. 6.
- Blot excess water from slide; decolorize one slide at a time in Acetone (10014) until the blue stops running, 1-2 dips.
  - a. Sections should be very light gray in color.
- 8 Quickly rinse in running tap water.
- Place in Basic Fuchsin Stain 0.25% Aqueous (1011) for 5 minutes.
- Rinse well in running tap water. 10.
- Differentiate sections in Gallego Solution (1098) for 5 minutes.
- Rinse in running tap water. Blot water off slide(s) but not to dryness.
  - Proceed with Steps #13 to #16 one slide at a time.
- Place in Tartrazine Stain 1.5%, Aqueous for 1 minute.
- Rinse well in running tap water. Dip in Acetone, 1-2 quick dips. 15.
- Dip in Acetone-Xylene 1:1 (10015) for 5 dips.
- Clear in three changes of xylene, 10 dips each; coverslip with compatible mounting medium.

### **RESULTS:**

Gram-positive bacteria Blue Gram-negative bacteria Red Nuclei Red Background tissue Yellow

# **PROCEDURE NOTES:**

- Drain slides after each step to prevent solution carry over.
- Do not allow sections to dry out at any point during procedure.
- If using a xylene substitute, closely follow the manufacturer's recommendations for deparaffinization and clearing steps.
